

VAMC - Malcolm Randall VA Medical Center Parking Garage
Gainesville, Florida

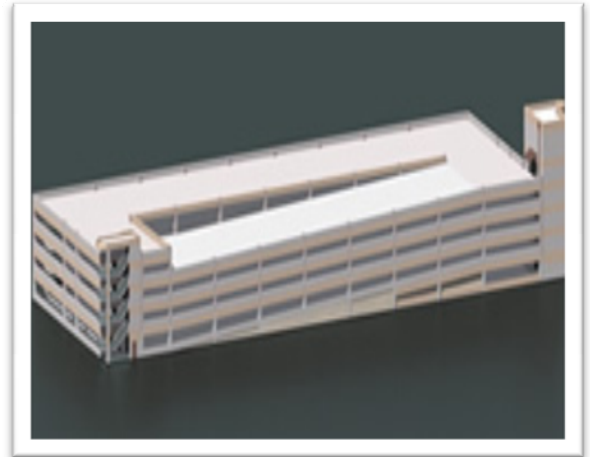

Owner: Veterans Affairs Medical Center

Architect: Akea, Inc

CMI Services: Cost Estimating

Project Description:

The scope of this project consists of the construction of a new five story, 633 spaces parking garage with associated mechanical, electrical and sitework. The parking garage includes auger cast piles with a precast concrete structure and membrane roofing.

CMI prepared Construction Documents estimate to included four (4) Alternates for different design options. By working closely with the Architect, CMI was able to establish different cost centers for the building and separately for the sitework and alternates. CMI also prepared internal schedules to assist with managing resources needed, and to calculate time-related costs in the estimate.
